Do you feel a constant urge to urinate or experience sudden leaks that disrupt your daily routine? You might be suffering from **Overactive Bladder (OAB)** — a common urological condition that can seriously impact your quality of life. Fortunately, expert care is available in Ahmedabad with **Dr. Raghvendra Kashyap**, a renowned urologist providing advanced treatment solutions at **Narayana Multispeciality Hospital** and **City Centre Arcade**.

💡 What is Overactive Bladder (OAB)?

Overactive Bladder (OAB) is a condition where the bladder's muscles contract involuntarily, even when the bladder isn't full. This leads to a frequent and sudden need to urinate, with or without leakage.

🔍 Common Symptoms of OAB

- ⚠️ **Frequent Urination** – More than 8 times a day
- ⚠️ **Sudden Urge to Urinate** – Difficult to control
- ⚠️ **Interrupted Sleep (Nocturia)** – Waking up at night to urinate
- ⚠️ **Accidental Leaks or Incontinence**

These symptoms can affect your work, travel, sleep, and confidence—but they are **treatable**.

❏ What Causes OAB?

- Neurological conditions (Parkinson's, stroke)
- Diabetes
- Urinary tract infections (UTIs)
- Bladder abnormalities (stones, tumors)
- Menopausal changes in women
- High caffeine or alcohol intake
- Obesity
